

NEAL S. LATMAN, PhD - Bio

Dr. Neal Latman is an associate professor in the School of Allied Health at Texas Tech University Health Sciences Center in Amarillo, Texas; President of a medical research firm, Epi Research Corporation; and Founder of a scientific and research consulting firm, NSL Associates. He holds academic degrees in physiological sciences, zoology, and biology with minors in psychology and chemistry.

Dr. Latman has previously held appointments as Director of Research at the Levi National Arthritis Hospital, Administrator of Technical Programs at the Texas State Dept. of Health, Special Projects Officer for physical fitness and conditioning at the USAIS, and Coordinator of the Kairos House Drug Rehabilitation Center of the Psychiatric Pavilion in Amarillo, Tx.

His areas of scholarly and research interests include protection and survival in aviation, the evaluation of medical technologies and procedures, the rheumatic diseases, and anti-inflammatory drugs. He holds several US patents on new anti-inflammatory drug therapies. Dr. Latman has published numerous original research articles in peer-reviewed medical and scientific journals.

Dr. Latman's consulting firm, NSL Associates, provides consultation on research protocols and experimental designs, data collection methodologies and measurements, data analysis and interpretation, and trouble-shooting and problem-solving to a wide range of clients from industry, academia, governments, and individuals.
